

Counting and packaging
solutions

About us

Cremer is a Dutch company that specialises in product counting and packaging solutions for the pharmaceutical industry, food and non-food industries and agricultural industry.

Product counting can be seen as the most efficient and cost effective alternative to modern weighing and pick-and-place systems for a wide variety of products. For products that may individually vary in weight, products that are difficult to separate or for packages that require a guaranteed number of (assorted) products, counting is proven to be the best solution.

With almost 70 years of experience and expertise Cremer has become the leading manufacturer of both standard as well as fully customised product counting and packaging systems. From conceptual design to final turnkey delivery, Cremer offers all the services you need when counting is the perfect solution for your products.

Pharmaceutical

Counting and bottle filling systems for the pharmaceutical and nutraceutical industry. Filling up to 400 bottles per minute.

Industrial

Counting and packaging solutions for food, confectionery, household detergents, coffee capsules, medical devices, hardware, etc.

Agricultural

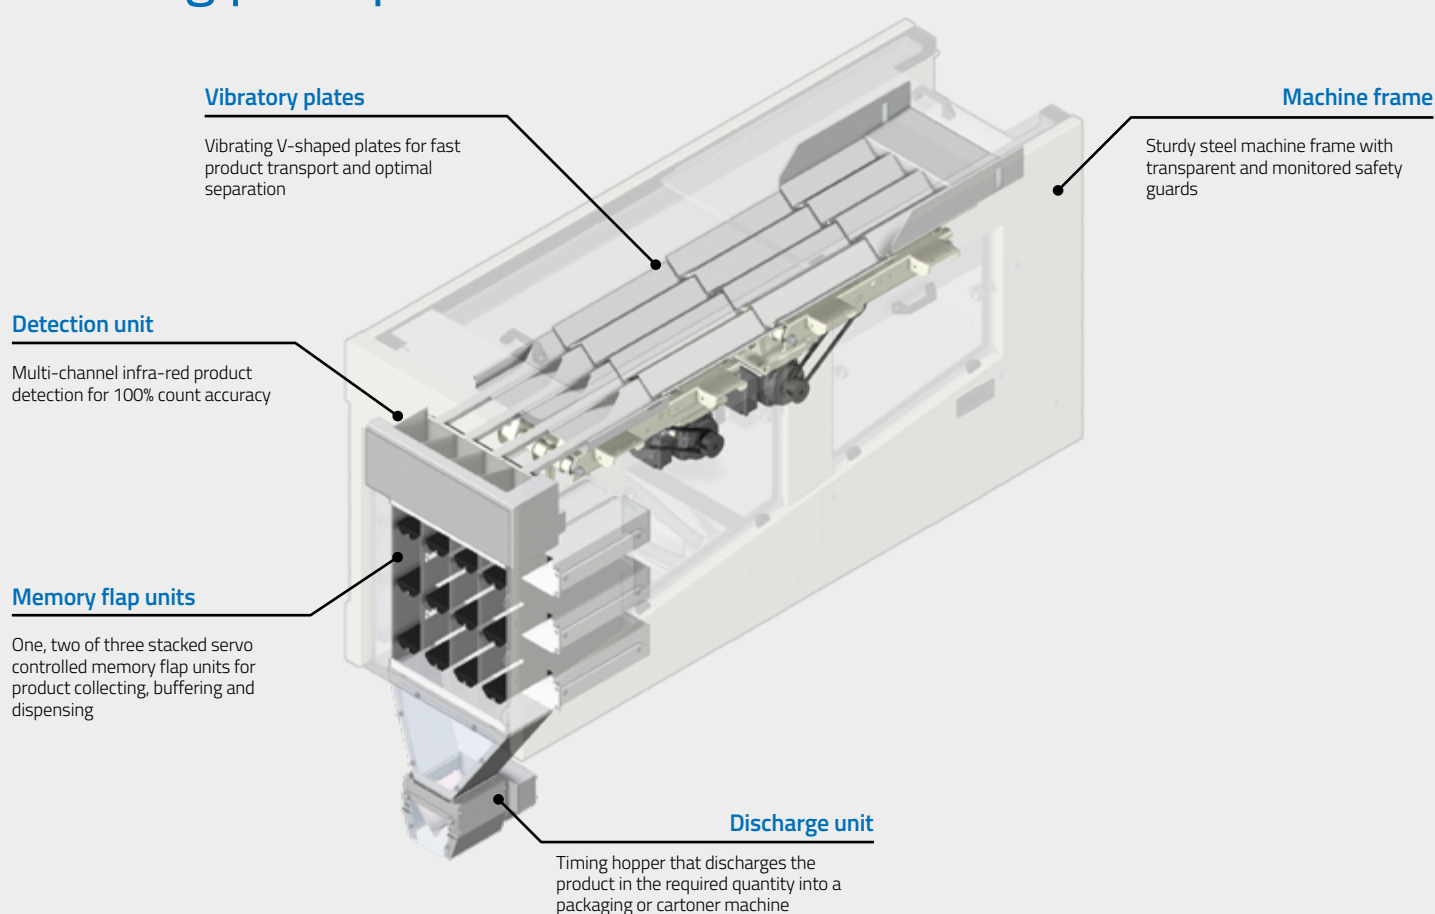

Counting and packaging machines for flower bulbs, seeds and many other bulbous and tuberous plants and vegetables.

Product counting systems

Working principle

24/7 operation and minimum down-time.

Low maintenance and no tools required.

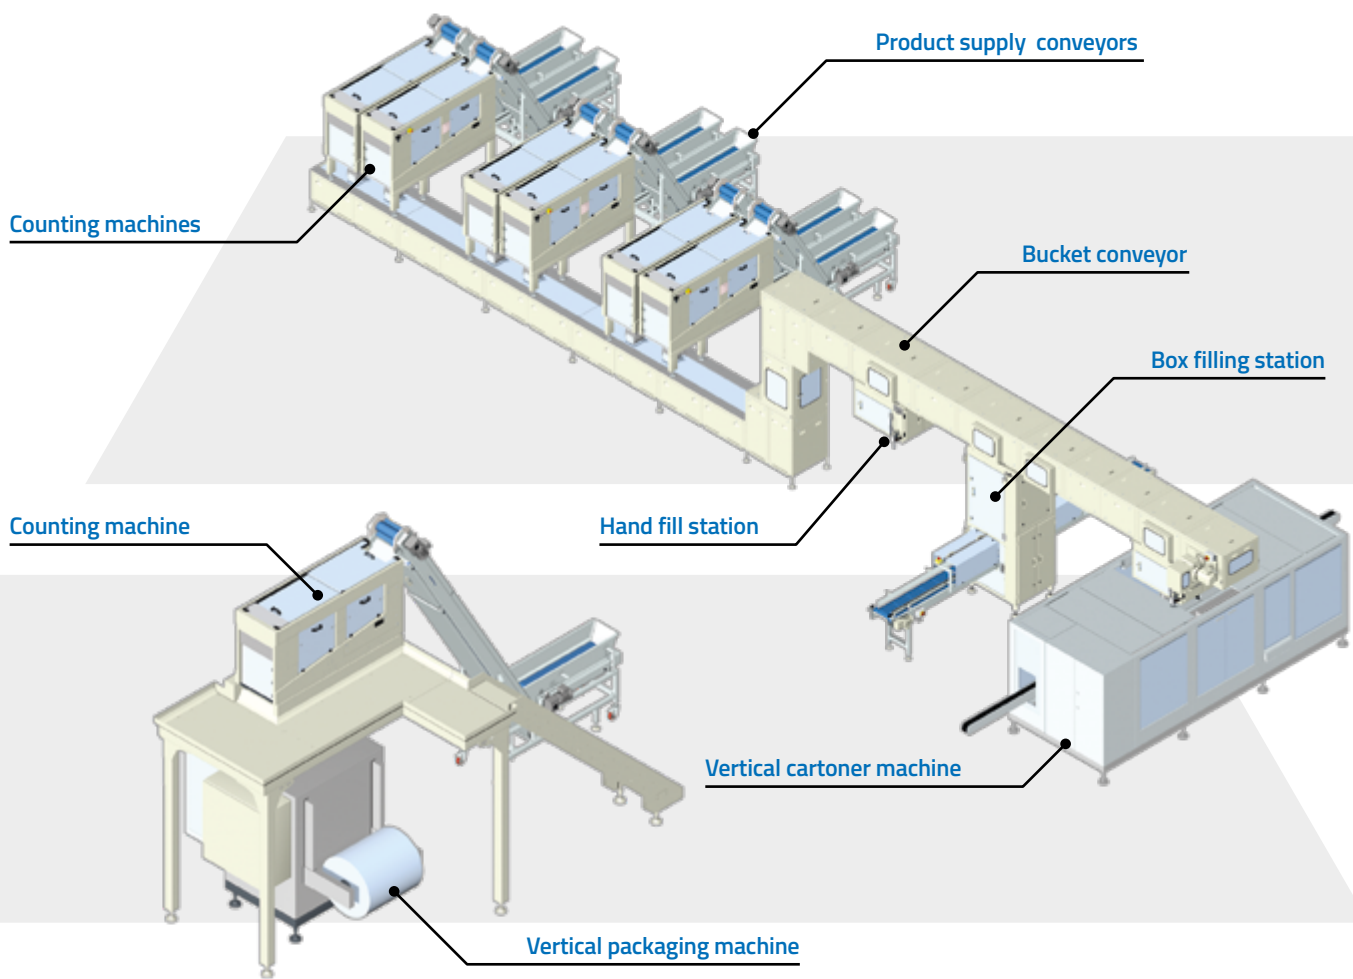

Silent operation and minimal wear.

Cremer product counting systems are perfectly suited for 24/7 operation in a wide range of applications. The counting systems are versatile in a way that almost any sort of product can be counted, provided that the products are separable by means of vibratory plates.

Proven low-maintenance, minimum downtime and silent operation are key features of the high end models that have found their way to many of world's largest suppliers of pharmaceutical, agricultural and food and non-food products.

Customisable configurations

Delivering standard machines or fully customised counting and packaging solutions.

Compatible with all industrial packaging and cartoning equipment.

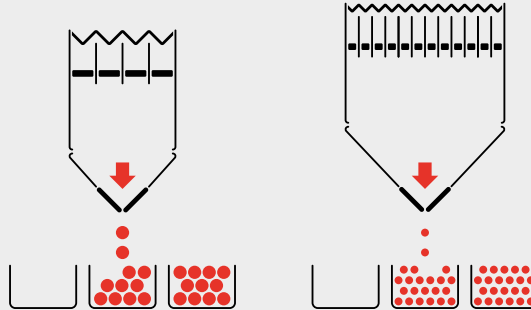

Easy-to-clean and FDA compliant contact parts for processing both food and non-food products.

Cremer product counting systems are the heart of a complete product packaging line. All available models can be used as a stand-alone machine that is placed on top of any packaging or cartoner machine.

Placing multiple counting machines over a bucket conveyor creates a precise mix of a variety of products. Cremer product counting machines are therefore the perfect solution for producing an accurate mix of assorted products.

Scalable performance

Basic

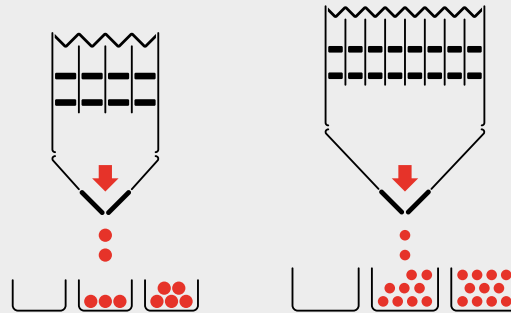

Stand-alone 'Basic' model with:

- 4, 6, 8 or 12 product detection channels
- single memory flap unit
- discharge unit

Best suited for filling cartons, bags or any other kind of package with a relatively large product count (20 products or more**).

Flex

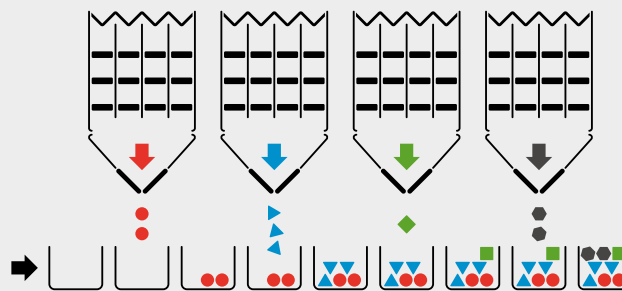

Stand-alone 'Flex' model with:

- 4, 6, 8 or 12 product detection channels
- dual memory flap units
- discharge unit

Best suited for filling cartons, bags or any other kind of package with a medium product count (10-20 products**)

Intelligent

A typical 'Intelligent' model has three memory flap units and is best suited for counting small product quantities (1-10 product per pack) at very high speed.

This configuration is the perfect solution for mix lines where the final pack requires an assorted mix of different products.

*) Dumps per minute, depending on the product count

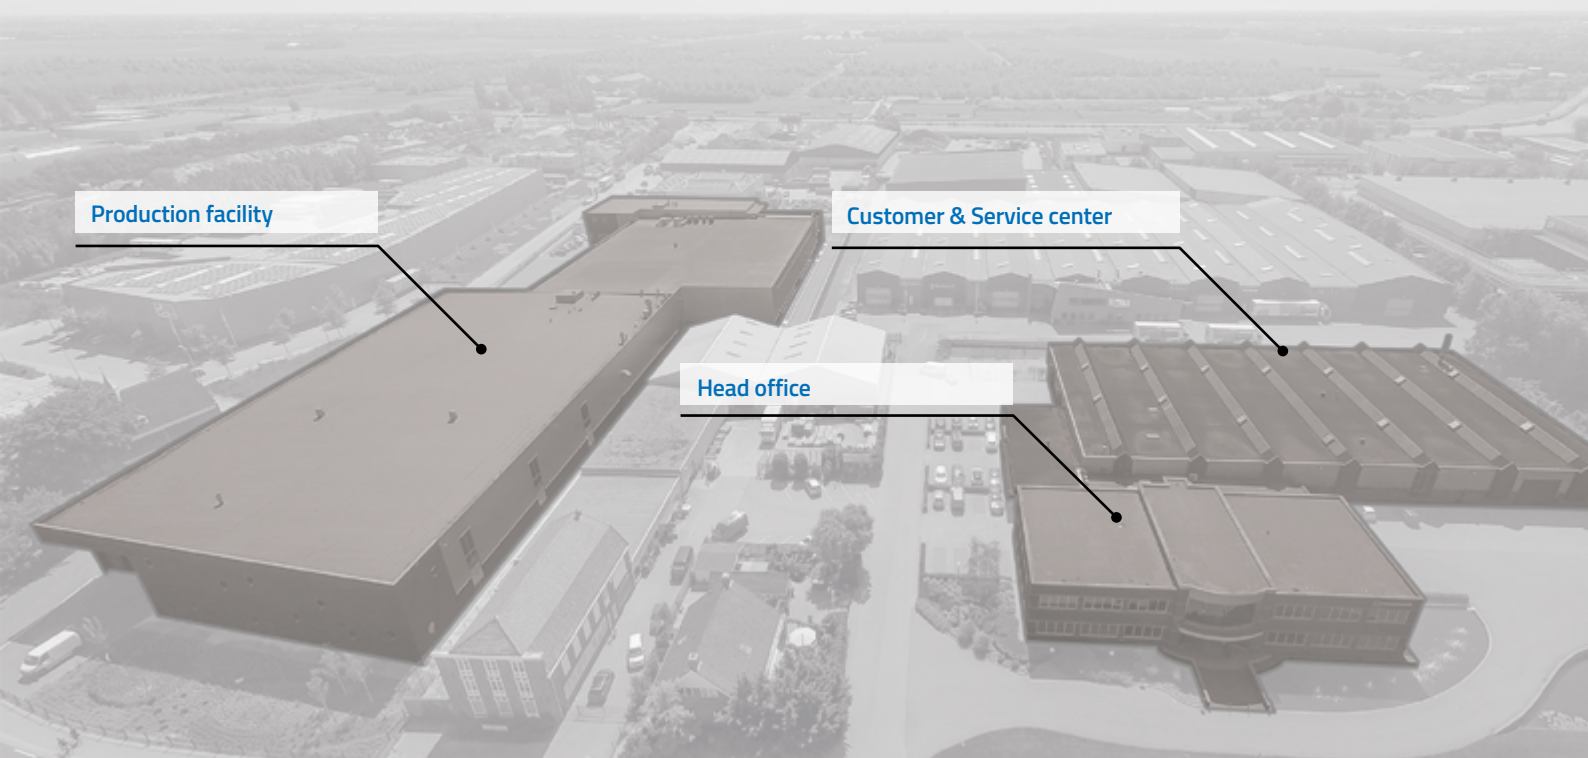

**) Depending on the product size

The modular approach of Cremer product counting systems offers great versatility regarding output and performance. Depending on the required production output, Cremer can provide of myriad of solutions for almost any counting and packaging challenge.

Our sales engineers are available for all questions you may have about product counting in general, or which would be the best counting and packaging solution for your specific product. Feel free to contact us for more information at sales@cremer.com or call us at +31 (0)252 41 90 38 or fill in the contact form on our [website](https://www.cremer.com).
