

## *Developed, engineered and manufactured by Newtec*

---

We have the solution, whether you weigh and pack apples, potatoes, carrots, bell peppers, citrus, onions, seafood or fresh cut products. If not, we will invent a tailor-made solution for you!

At Newtec, we design solutions to your specific needs by combining existing technologies and machines in new and innovative ways.

70% of our completed projects are in fact tailor-made to meet your needs.

Newtec is synonymous with quality and our machines are built to last - using only the best materials and latest technologies within software, automation and mechanical engineering.

Through close cooperation, we provide you with a solution aligned with current trends and demands within the food industry and thereby designed to improve your competitiveness.

Regardless of product or packaging, portion size and capacity, we have your upgradeable solution.

## Excellence through collaboration

Understanding your business and the challenges you face enables us to deliver solutions that make an impactful difference.

In close cooperation with you, we enjoy and take pride in tailoring, constructing and installing your perfect solution.

Whenever you approach us with a challenge, you can be certain that a team of dedicated experts, with impressive know-how and long-term experience in challenging weighing and packaging projects, will go the extra mile to meet your needs on schedule.

We look forward to weigh and pack your products and contribute to optimising your production.
