

## Eclipse™ Shrink Sleeve

We are offering Shrink Sleeves with a new highperforming light blocking shrink film: Eclipse™. This innovative product introduces maximum light blocking properties into the film process, and satisfies the market need for films that are cost-effective, process efficient and improve light barrier characteristics. Eclipse™ films offer high performing shrink percentages for optimal design freedom while eliminating the need for high-barrier primary containers.

### Benefits:

Eclipse™ affords a unique blend of benefits across applications, including:

- ✓ Reduced total package costs  
(replaces HDPE multi-wall primary containers)
- ✓ Extended shelf life
- ✓ Vitamin protection (dairy products)
- ✓ Off-taste reduction (dairy products)
- ✓ Color protection

### Applications:

Eclipse™ technology is ideal for new or redesigned packaging. Applications include consumer packaged goods using PET bottles for:

- ✓ Beverage
  - Dairy
  - Juices
  - Organic beverages
  - Isotonics
- ✓ Food
- ✓ Health and beauty
- ✓ Home and garden
- ✓ Household

### Capabilities:

- ✓ Light-blocking with transmission rates of < 1%
  - Maintains vitamin protection
  - Maintains product color
- ✓ Whitest film compared to current options
- ✓ No multiple flood coat printing required to achieve light blocking characteristics
- ✓ Prints and seams like PETg
- ✓ Higher modulus for easy application
