

## Modern machinery

**Pre-press**  
Top quality is being achieved with in shortest time by our in-house pre-press.

**Plate production**  
Print plates are manufactured in-house without environmentally hazardous substances and residues.

**Aluminum briquetting system**  
For a best use of aluminum waste, it is pressed to solid briquettes.

**Presshall**  
A state-of-the-art machinery, including 5 UV-Flexo-printing machines, makes us most efficient and enables us to produce high-class print quality (up to 9 colors)

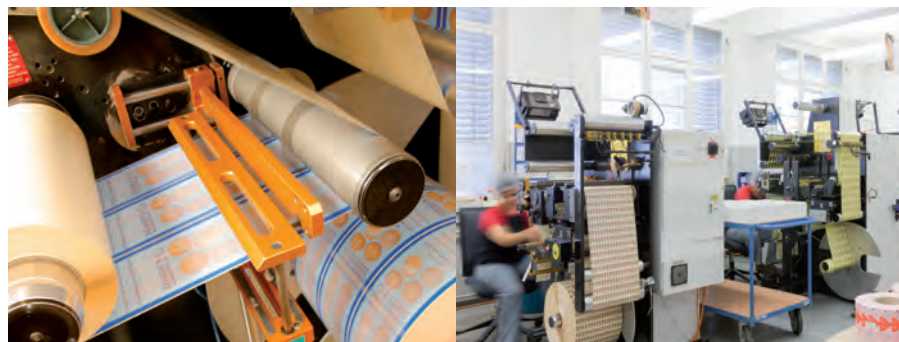

**Quality control**  
Seal test, color adhesion, EAN Code, migration test, final inspection to ensure the highest quality.

**Punching shop**  
In our cleanroom we produce die-cut lids in many different shapes on modern and powerful die-cut systems

**Raw material and semi-finished products storage**  
Modern storage logistics in air-conditioned surroundings.

**Equipment**  
We cater to the individual needs of our customers and produce material on reels. In addition to punched parts, we also deliver printed aluminum and foils in rolls upon our customers request.

**Production site 2**  
In the new factory at "Werdenstrasse", the production of die-cut lids has been optimized furthermore.

Why more «Flexobility»?

Sometimes it takes a new creation to express what you want to say in a perfect way. In this case, with 'Flexobility', we created a logical creation between flexibility and flexographic printing. These are the two terms that define our company and are therefore very important to us.

Etimark stands for the highest flexibility and the cutting-edge UV flexographic printing technology.

Etimark is certified according to SN ISO 9001:2008 and BRC/IOP Global Packaging.

...in sales

Thinking ahead, developing, and recognizing today what will be required the day after tomorrow. We take responsibility ourselves, starting with our own decisions, and always try to develop the perfect solution for our customers using the available resources. This also involves a sense of fairness and transparency. Our primary goal is to be an essential and absolutely reliable longterm partner for our customers.

...in management

When a company, such as Etimark, wants to be successful on the market, it should be based on long-sighted and realistic financial planning, an inventory of state-of-the-art machines, and extremely effective and streamlined processes. Primarily, it is the employees who identify with the company and form the basis of our success with their personal responsibilities.

...in production

The products for our customers are manufactured at the heart of our company. The low-emission and energy-efficient processes are our highest priority. In addition to our positive views on the environment, a driving force for us is the clear focus on reducing costs and resources, and finding the right solutions. This makes us a respectful partner for the future.

FACTS & FIGURES

Founded in	1978
Owners	Udo and Marco Schulz; A family-owned company in the second generation
Staff	60 employees
Products	FlexoLabels FlexoLids FlexoPackaging
Export	40% in the EU
Member	FlexoSuisse, SVI, GS1 CH, EAFA/FPE

Etimark AG is the Swiss market leader in FlexoLids (cutting lids/foils)

More than 800 tons of aluminium per year are processed in Grabs

More than 1 billion die-cut lids per year are produced

No.1 in peripheral embossed die-cut lids

Certification  
Our professionalism is reflected in the complete traceability of all products, the perfect cleanliness of premises and equipment.

BRC/IoP  
We have been manufacturing our products in accordance with the BRC Standard for packaging manufacturers since 2006. We have always successfully passed the audits with an «advanced level» score.

ISO9001:2008  
Etimark is one of the first printing companies whose management system was certified according to the process-oriented approach of the ISO standard in 2000.

IRD – Best Practice  
In 2009, we received the prestigious award of IRD for our IT-based process automation.

Product range

FlexoLabels  
FlexoPackaging  
FlexoLids  
Price Labeling

FlexoLabels  
Labels made of paper, plastic, labels with a metal look, with a no-label-look, with a retro design or with special effects. Etimark has the right label solution for every application area- especially tailored to your product.

FlexoPackaging  
Reel-wound foils for cosmetics and body care products, confectionery, food packaging and beverage industry applications.

FlexoLids  
Die-cut lids made of aluminum, PET or other mono-films, die-cut lids with different thicknesses, die-cut lids in standard or special formats. Etimark has the matching film seal for cups and containers for the milk, food and animal feed industry.

INNOVATION

ETIgral®  
The smooth, edge-embossed aluminum lid  
Our solution for a unique look of your yoghurts.

The peripheral embossing is flattened by the sealing head during sealing process. The embossed tab facilitates the de-stacking of the lids.

ETIgral3D®

The new dimension for aluminium lids with partial embossing

A future development to ETIgral® – Finding a targeted balance between image and the individual embossing makes it possible to achieve visual effects that make your lids truly unique.

Price labeling  
It can be used both for labeling prices, dates, item codes, country codes, product names, etc. Simple applications require simple solutions. We use the most reliable equipment produced by Contact, HADE and Avery Dennison to print information onto your products. Low weight and ease of use enable fatigue-free operation.

Materialien	Paper, plastic foils, thermal material	Mono and multi-layer foils	Aluminum or PET
Formen/Masse	Customized	Up to 300 mm wide	standard sizes and customized
Materialdicke	From 50 to 150 microns	From 20 to 200 microns	From 30 to 100 microns
Druck	Neutral or up to 8 colors	From 1 to 8 colors	Neutral or up to 9 colors
Klebstoffe	For all applications	–	–
Siegelbar	–	To seal against itself, plastic	To seal aluminum or plastic cups
